

Dear Captains,

We are encouraging Buzzelli skippers to use RaceQs free phone app to record our regattas. After the race, we will be able to watch a 3D replay of the entire fleet up at the club or at www.raceqs.com under Regatta Replays on your own PC or mobile device. The replay should spark some interesting post-race group analysis.

Online Instructions: <http://raceqs.com/regatta-replay/>

Smart Phone Instructions

If you have a smart phone, you can automatically upload your 3D replay.

1. **Download** the free raceQs app onto your [Andriod](#) or [iPhone](#).
2. Open the app and **login** with Facebook, or create an account with your email address.
3. Launch the app, and **go sailing**.
4. When your phone connects to Wi-Fi, it will **automatically upload** your GPS track and turn it into a 3D race replay.
5. Use a **computer** to login to your account on www.raceqs.com to view, edit, and share your 3D race replay.

Manual GPS Track Instructions

If you don't have smart phone, you can manually upload your "regular" GPS tracks.

1. Extract and **save the GPS file** from your race onto your computer.
2. Go to www.raceqs.com and **login** with Facebook, or create a free raceQs account with your e-mail address.
3. Once you are logged in, on the left side of the page is a button for "**Upload GPS**".
4. Follow the on-screen directions to upload your saved track to your raceQs account.
5. Your GPS track will be transformed into a 3D replay that you can **edit and share**.

All the boats in your fleet who were running raceQs will automatically be added to your replay, allowing you to compare your performances.
