RaceQs Instructions

Both days of sailing will be tracked via the RaceQs app. The application is available on google play and the IPhone app store.

Once you download the app you will be able to open the app and add in your boat information to set up the app.

For safety reasons, it is highly recommended by the RC that boats run the RaceQs app with live tracking enabled during Saturdays distance race. A computer and large screen TV will be set up at the RC tent on Saturday for those onshore to monitor the boats as they progress around the course.

To join the regatta on the RaceQs app:

The regatta will be active in RaceQs at 11:30 each day. Once it becomes active you will be able to join the regatta one the app.

Launch your web browser on your mobile device and go to the following address

http://raceqs.com/regattas/56832

Once the regatta opens at 111:30 you will see symbols on the bottom left of the screen.

Select the single boat Icon and your RaceQs app will launch you automatically into the regatta.

> (See screenshot. Highlighted by yellow box.)

Please have live streaming enabled so that those ashore may monitor the progress of the regatta.

If you have any questions on the RaceQs app please see the PRO Roger Howard immediately after the Skippers meeting.

As a side note, Live streaming of the regatta is done with a time delay so that an unfair advantage cannot be gained by usage of the application.
