

Parking

- On arrival, please unhook your trailer in the upper stone parking lot. Please unload and step your mast in this area. We advise you bring plenty of padding for your boat as this lot is a stone lot.
- Wheel your boat to the beach through the gate.
- Generally traffic flow is clockwise in this lot, but if no cars are present you can go straight to the beach.
- You can put your boats on the beach in front of the first row of boats. Please keep a lane open to the water and allow other boats to proceed down the beach. The high tide line is generally visible, so make sure you put your boat above the high tide line.
- Trailers will stay in the stone parking lot as shown in the diagram below. If you have brought 2 boats to use in separate events, please leave the boat you are not using on the trailer.
- If you have an RV, you can proceed into the sand lot where you will be directed to a parking space. We will have to park them close, so awnings may not be useable.
- Do not park cars or trailers against the concrete wall where large boat trailers are stored. If you do, you must leave your keys in the car in case it needs to be moved.
