

## NACRA 15 CLASS ASSOCIATION

Due to the unavailability of the appropriate equipment, many boats will not be able to abide to rule C.5.1.a.i as currently specified (under the trampoline, quick righting line).

In accordance with RRS - 87 CHANGES TO CLASS RULES, the IN15CA Technical Committee allows those boats to install their righting line per previous rule C.5.1.a.i dated 14 June 2021 for this event only.

### C.5.1 MANDATORY

- (a) For use:
  - (i) A righting line shall be attached at the dolphin striker rod and shall be a minimum of 10 mm diameter and 5 m in length.

On behalf of the IN15CA Technical Committee,

Yorick Klipfel  
Technical Committee Chairman
