

Read your User Guide

FIRST THINGS FIRST

- SPOT needs a clear view of the sky to obtain a GPS signal
- Orient SPOT so the logo faces toward the sky
- Keep SPOT at least 12 inches away from other GPS devices
- Install the appropriate Lithium batteries

- Follow the user's guide for your SPOT to get a GPS fix
- Supply the race committee with the link to your shared page and with your serial number located inside the battery compartment
- If you are renting a SPOT through the race committee, the vendor will provide us with the shared page and serial number for the rental unit

You are responsible for your track

- Learn how to put your SPOT into track mode and test it out well ahead of the race.
- Assign a crew member to keep SPOT functioning and make sure your crew member understands how to keep SPOT in track mode.
- Failure to keep your SPOT in track mode may result in a penalty or disqualification.

*Have your friends
follow the race on*
