

Dear Captains,

Our Yacht Club is encouraging our members to use RaceQs free phone app to record our regattas. After the race, we will be able to watch a 3D replay of the entire fleet up at the club or at [www.raceQs.com](http://www.raceQs.com) under Regatta Replays. The replay should spark some interesting post-race group analysis.

### Smart Phone Instructions

If you have a smart phone, you can automatically upload your 3D replay.

1. **Download** the free raceQs app onto your [Andriod](#) or [iPhone](#).
2. Open the app and **login** with Facebook, or create an account with your email address.
3. Launch the app, and **go sailing**.
4. When your phone connects to Wi-Fi, it will **automatically upload** your GPS track and turn it into a 3D race replay.
5. **Login on a computer** to your account on [www.raceQs.com](http://www.raceQs.com) to view, edit, and share your 3D race replay.

### Manual GPS Track Instructions

If you don't have smart phone, you can manually upload your "regular" GPS tracks.

1. Extract and **save the GPS file** from your race onto your computer.
2. Go to [www.raceqs.com](http://www.raceqs.com) and **login** with Facebook, or create a free raceQs account with your e-mail address.
3. Once you are logged in, on the left side of the page is a button for "**Upload GPS**".
4. Follow the on-screen directions to upload your saved track to your raceQs account.
5. Your GPS track will be transformed into a 3D replay that you can **edit and share**.

All the boats in your fleet who were running raceQs will automatically be added to your replay, allowing you to compare your performances.
